# TABLE OF CONTENTS

<u>Table No.</u>	<u>Page No.</u>
1. Federal order minimum class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, February. . . . .	4
2. Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-February averages. . . . .	6
3. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, February . . . . .	8
4. Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, February. . . . .	10
5. Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I, January-February. . . . .	12
6. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, January, with comparisons . . . . .	14
7. Federal milk order Class I formula price information, February. . . . .	18
8. Prices and economic indexes used in Federal milk order formulas to determine February prices, with comparisons . . . . .	19
9. Federal order base and excess prices for milk of 3.5 percent butterfat content, February . . . . .	20
9a. Seasonal incentive fund included under various Federal milk orders, February . . . . .	20
10. Total fluid sales by handlers regulated under Federal milk orders and percentage of such sales in other Federal order areas and outside Federal order areas, January 1966. . . . .	22

# FEDERAL MILK ORDER MARKET STATISTICS

## Highlights

### February 1966

Producer Deliveries. A total of 150,999 producers delivered 4.2 billion pounds of milk to regulated handlers in 72 comparable markets during February 1966. This represents a decrease of 2.9 percent under producer deliveries in February 1965. Average daily delivery per producer increased from 952 pounds in February 1965 to 984 pounds in February of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 72 markets increased 3.9 percent from last year, to a total of 2.8 billion pounds for the month of February 1966. The average utilization percentage for February was 67 percent, up from 62 percent last year. Forty-six markets showed an increase in the utilization percentage, 8 showed no change, and the remaining 18 markets showed a decrease (See table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, increased 4.2 percent in the 72 markets for the month of February.

Minimum Prices. The weighted average Class I price paid by handlers in the 72 markets for 3.5 percent milk was \$5.22 per hundredweight, 24 cents higher than the \$4.98 per hundredweight price in February 1965. Minimum Class I prices in February were higher in 68 markets, unchanged in two markets, and lower in the remaining two markets.

Producers in the 72 markets received a weighted average blend price of \$4.66 per hundredweight for 3.5 percent milk. This is 33 cents higher than the February 1965 blend price of \$4.33. Producers received higher blend prices in 70 markets, the same price in one market, and a lower price in the remaining market. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Whole Milk Sales. Total in-area whole milk sales for February 1966 in 69 marketing areas are estimated to be about 1.8 billion pounds, 2.3 percent above such sales in February of last year. Complete January in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

## YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-February period for the 72 markets was \$5.23, 20 cents higher than the \$5.03 price in 1965. The 1966 weighted average blend price was \$4.64, 28 cents higher than the blend price of \$4.36 reported for this period in 1965 (see table 2).

Producer Deliveries and Deliveries Used in Class I. Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. In the first two months of this year, compared to the same period in 1965, producer deliveries for the 72 markets were down 3.4 percent, and deliveries used in Class I were up 3.6 percent. Data for the 72 markets and for all markets are summarized below:

Producer Milk Deliveries and Deliveries Used in Class I, January-February

Markets	Producer Deliveries			Deliveries used in Class I		
	1966	Change from 1965		1966	Change from 1965	
	1,000 lb.	1,000 lb.	Percent	1,000 lb.	1,000 lb.	Percent
72 Comparable markets 1/	8,954,813	-306,058	- 3.4	5,614,222	+202,217	+ 3.6
2 Non-comparable markets 2/	20,147	+106,894		17,622	+ 89,118	
74 All markets	8,974,960	-199,164	- 2.2	5,631,844	+291,335	+ 5.2

1/ Markets under continuous regulation since January 1, 1965, which have had no significant marketing area expansion.

2/ Tampa Bay and Mississippi.

1/ Markets under regulation on January 1, 1965, and which have had no significant marketing area expansions. Excludes Tampa Bay and Mississippi.

2/ Class I plus Class II = 487,415 thousand pounds in 1966 and 481,915 thousand pounds in 1965; utilization = 54% in 1966 and 52% in 1965.

3/ Fluid cream included in Class I, effective April 1, 1965. Class I plus fluid cream, February 1965 = 191,623 thousand pounds, utilization 39%.

4/ 1965 data applies to the former Mississippi Delta market.

5/ Adjusted for duplication due to intermarket transfer.

# Fluid sales by pool handlers

The scope of regulation under Federal milk marketing orders is based on the areas in which milk is sold rather than those in which it is produced. Handlers having substantial distribution of milk and milk products within a specified marketing area are subject to the terms of the order for that area or market. However, marketing areas usually do not extend to the limits of the sales routes of all regulated handlers, with the result that some of the sales by such handlers are made outside the defined marketing area of the order by which they are regulated. Such sales may be made between handlers regulated under different orders, or a handler regulated under one order may make direct route sales in another order area. Regulated handlers may also make sales in unregulated areas. Conversely, the total sales by regulated handlers in a particular area do not represent all fluid sales made in that marketing area, since handlers regulated by other Federal orders and unregulated handlers may also sell milk in the area.

The percentage of fluid milk sales, packaged and bulk, made by regulated handlers in their respective order areas, in other Federal order areas, and outside Federal order areas for the month of January 1959 through 1966, are summarized below:

January	Total fluid sales	In-area as a percent of total	Inter-order sales 3/		Sales outside Federal order areas			
	1/	2/	Packaged	Bulk	Total	Packaged	Bulk	Total
Year	1,000 lb.		Percent					
1959	1,731,132	84.7	3.0	1.8	4.8	13.6	1.7	15.3
1960	1,866,775	85.8	3.3	1.6	4.9	12.9	1.3	14.2
1961	2,038,347	86.8	3.8	1.8	5.6	11.9	1.3	13.2
1962	2,256,698	86.5	4.3	1.6	5.9	12.2	1.3	13.5
1963	2,350,242	88.2	5.6	2.9	8.5	10.7	1.1	11.8
1964	2,482,047	88.4	6.2	2.5	8.7	10.4	1.2	11.6
1965	2,462,273	88.6	5.9	1.7	7.6	10.4	1.0	11.4
1966	2,603,090	88.8	7.3	2.0	9.3	9.2	2.0	11.2

1/ Figures adjusted to eliminate duplicate reporting.

2/ Includes inter-order sales.

3/ Includes route and inter-handler sales in Federal order areas.

Fluid sales by regulated handlers in January 1966 totaled over 2.6 billion pounds, 5.7 percent greater than such sales reported in January 1965. Sales by regulated handlers outside the areas under which they were regulated totaled over 534 million pounds in January 1966, 14.3 percent more than the 467 million pounds reported for last January. Of total fluid sales by regulated handlers, 9.3 percent were to other Federal order areas (inter-order sales), and 11.2 percent were to unregulated areas outside Federal order areas. Approximately 80 percent of such milk movements was in packaged form, down from 86 percent in January 1965.

Sales in other Federal order areas, with the exception of last year, have shown a continuous increase. Improvements in refrigeration and transportation are factors which tend to increase sales in other Federal order areas by some large handlers who operate centralized distributing plants. Also, short supplies in some markets this January contributed to the increase in inter-order sales. Sales outside Federal order areas during January 1966 declined to 11.2 percent of total fluid sales. This was a continuation of the steady decrease which has prevailed since January 1959. Enlargement of the program, by the addition of new marketing areas and the expansion of existing marketing areas, is an important factor which results in a smaller proportion of sales by regulated handlers being made outside the order areas under which they are regulated.

Total fluid sales by regulated handlers in the 73 Federal order markets in January 1966 are reported on table 10. Also reported are the percentages of sales, packaged and bulk, made by such handlers to other Federal order areas and to nonregulated areas. The relative size of sales in these unregulated categories depends upon the nature of the marketing areas. In most of the markets which include large metropolitan areas, distribution of fluid milk outside defined marketing areas represented a relatively small proportion of total fluid sales. Conversely, in markets with smaller population centers, sales outside defined areas represented a larger proportion of total fluid sales.

ASCS-FMOS

MAJOR ORDER ACTIONS, FEBRUARY 1966

Amendments:

Clarksburg and Wheeling - February 1 (30 FR 15580 and 15579, 12/17/65). Amendment permits a supply plant to qualify for pooling in any month on the basis of its shipments during the month. Formerly supply plants could qualify for pooling only by shipments in September through January. Sour cream mixtures not labeled "Grade A" and the butterfat in fluid milk products dumped or sold for livestock feed are classified as Class II. Amendment provides for milk diverted between pool plants to be allowed Class II shrinkage only at the plant of physical receipt. Action establishes uniform monthly Class I differentials of \$1.73 in Wheeling and \$1.98 in Clarksburg. The annual average differential is unchanged. The Clarksburg Class I price is limited to not more than 35 cents above the average of the Wheeling and Tri-State (Athens district) order Class I prices and not less than such average price plus 15 cents. Amendment replaces the Midwest Condensery price with the Minnesota-Wisconsin price in determining the Class II price. The Class II price is limited to not more than 10 cents over the butter-powder formula price.

Paducah - February 1 (31 FR 1200, 1/29/66). Amendment provides a temporary increase in the Class I price by setting such price at not less than \$4.90 for February 1966 and not less than \$4.70 for March through June 1966.

Youngstown-Warren - February 1 (30 FR 15581, 12/17/65). Action removes, during the months of April through July, the provision that shipments from supply plants be considered as receipts at a distributing plant in computing the percentage of Class I disposition by the distributing plant for determining pool plant status. Action replaces the Midwest Condensery price with the Minnesota-Wisconsin price in determining the Class II price. The Class II price is limited to not more than 10 cents over the butter-powder formula price.
